

Sanitary Safety Valve

卫生级减压阀

Product Information 产品信息

Safety Valve is designed to relieve an over-pressured situation to ensure the safety of pipelines, pumps, tanks, etc., thus to avoid any damage of all equipment. When the pressure in the pipe exceeds to the specify pressure, the valve open automatically to make the liquid flow to reduce pressure.

减压阀是用于减少压力过大的情况保护管道，泵的安全以防止压力过高导致设备损坏。当管道中的压力超过设定值，减压阀会打开让流体通过达到减压的目的。

- Operation: Pneumatic
操控: 气动
- Working Temperature : -10°C to +121°C
工作温度: -10°C to +121°C
- Working Pressure : Spring adjustable
工作压力: 弹簧可调节
- Steel Material: 304 / 316L
金属材料: 304/316L
- Seal Material : EPDM
密封圈材质: 三元乙丙
- Size: 1" to 3" (other sizes available on request)

Size	d	D	K	H	H1	L
1.0"	22.4	25.4	50.5	227.0	61.0	61.0
1.5"	35.1	38.1	50.5	227.0	58.0	59.0
2.0"	47.8	50.8	64.0	270.0	66.0	66.0
2.5"	59.5	63.5	77.5	318.0	77.0	77.0
3.0"	72.2	76.2	91.0	351.0	97.0	97.0
